

Activity Playground Centre

The scheme is located within an existing residential estate and includes the decommissioning of an existing underground car park. The scheme is funded jointly by Local Authority and the Housing Association and provides a new single storey Adventure Playground with a green roof, secure play area, 2 sunken feature communal gardens for residents and new surface level car parking provision.

Our appointment included Planning Application and working drawings for the scheme, Design and Access Statement and production of an Environmental Impact Statement. Works due to commence on site early 2010.
